Objet Market Study for Titanium scraps and turnings

Dear Sir,

Let me introduce myself : my name is Raymond ALLIER and I'm projet manager at AUBERT & DUVAL (ERAMET Group). I'm working on a projet for recycling Titanium solid scraps and turnings.

So the AUBERT&DUVAL's top management and myself we are looking for specialists who could help us to better understand the Titanium solid scraps and turnings market on the European market.

More precisely, we would like to know the following elements :

- Titanium flow synoptic in Europe, in ingots, mill-product and finished producted. Analysis in tonnes, grade by grade.
- How many tons of titanium are produced in Europe (grade by grade) ?
- For which applications (medical, aerospace, industrial, defense...) ?
- Wat sort of products (flat bar, sheet, closed die part ...) ?
- How many tons of Titanium solid scraps and turnings are generated in Europe ?
- Are there other forms of scraps (wire...) ?
- What happens to these scraps and turning (do they remain in Europe ?)?
- Which company recover these scraps and turning ?
- Which company process these scraps and turning (process = sorting, cleaning, degreasing, analysing...) ?
- How many tons of scraps and turnings are available to be purchased in Europe ?
- ...

If you are interested to do this study for us, could you send me an budget offer. Is it possible to send me your response the first week of 2011 ?

If you have some questions, don't hesitate to send me an e-mail.

Looking forward to reading from you.

Best Regards.

Raymond ALLIER
