

## **OPEN-DIE FORGINGS**

### **A&D PRODUCT MANUAL Part II**

Please find attached the **Open-die forgings Product Manual & the updated Grade Name Table**, this latter now valid for Part II as well as for Part I.

This is not an exhaustive picture of our capabilities, but more what we are able and willing to offer to the market place. It covers parts to be produced either in Firminy or in Les Ancizes.

This manual will guide you when facing prospects.

It is CONFIDENTIAL and for your OWN USE ONLY.

Coming after our LONG PRODUCTS AND TOOL STEELS STANDARD OFFER (see EscalADe Nr 1), this Product Manual Part II will be later completed by an other section relating to closed-die forged parts.

Any remark or suggestion for improvement is welcome.

Philippe Saint-Maurice
