

## The Eramet Alloys Competition Database (CDB) now accessible on line!

This Erasteel / Aubert&Duval joint database will facilitate the storage and retrieval of information related to our competitors.

### Content

You will find

- a list of our main competitors, and their group stockholder when applicable
- for each of these competitors, their main business and production features + a direct access to their website
- depending on competitors, one or several detailed files (press articles, brochures, presentations, reports, etc.). Sections not appearing means they are not documented.

Additional documents such as synthetic tables and information on 'marginal' competitors (AD only) are also available.

### Operation

Please click on the following link and drop it into the left side of your Notes Template, for an easier future access. [CDB](#)

Then you can make yourself familiar with the content. Although the format is rather userfriendly, you will find attached a simplified User's Guide. Should you require additional assistance in the understanding, please do not hesitate to contact us.

In case of technical difficulties or slow speed to reach the files, please contact your hotline. We could not get any confirmation that this system will operate smoothly whatever the configuration.

### Help us to help you !

This database is far from being completed. With your help, we will continue to fill it. We therefore welcome any valuable / original information. If you already have some relevant information which is not included in the CDB yet, please send it to Nathalie Bourgis for upload.
