

Ahead in the race!

With the new leaflet "Special Steels and Superalloys for Motorsport"

Aubert&Duval and Erasteel offer the widest range of solutions to meet the extreme requirements of the motorsport industry.

This leaflet is our identity card! It will help us strengthen Aubert&Duval and Erasteel's image and promote our joint offering to develop new customers and applications.

Today we are the key supplier for Formula 1 for engine and transmission applications (crankshafts, camshafts, gears, driveshafts...). We want to reach the same level of excellence in the other race formulas such as DTM (German Touring Cars), WRC (World Rally Championship), NASCAR in the USA, MotoGP and PowerBoat P1.

Do you know we already supply the INDYCAR series in the USA? All engines (Honda V-8) are equipped with GKHW crankshafts.

You will find attached, a .pdf version of the brochure, for your own use/reference only. Customer's copies can be ordered at the following e-mail address documentation-ad@eramet-aubertduval.com.
