

**CLOSED-DIE FORGINGS**  
**OPEN-DIE FORGINGS IN ALUMINUM ALLOYS**  
*A&D PRODUCT MANUAL PART III*

Please find attached the **updated Open-die forgings Product Manual including Aluminum products & Grade Name Table and the Closed-die Forgings Product Manual**, this latter now valid for Part III as well as for Part I and Part II.

This is not an exhaustive picture of our capabilities, but more what we are able and willing to offer to the market place. It covers parts to be produced in all Aubert&Duval Plants.

This manual will guide you when facing prospects. It is CONFIDENTIAL and for your OWN USE ONLY.

You will also find attached the complete Aubert&Duval Internal Product Manual. The printed version will be available in June.

Thanks to all for your contribution. Any remark or suggestion for improvement is welcome.
