

## ADonix a Tool for a more powerful Sales Force

**ADonix**, the presentation tool developed by the technical and marketing teams to promote our sales, is released today. **ADonix** presents AUBERT&DUVAL grades and markets. It also contains useful technical information. The software can therefore be used for technical developments as well as trainings. **But no copy can be made outside the company.**

**ADonix** software is installed and updated by each user from the AUBERT&DUVAL extranet website. All users are given a *login*, a *password* and a *user's manual*. The tool will evolve in the future and all blank sections will be completed.

The **ADonix** team wishes you a good use of the software and welcomes your improvement suggestions.
