

## The New AD Website [www.aubertduval.com](http://www.aubertduval.com) A wider Opening to the Market !

Customers and Prospects are more and more relying on Internet to source information on products, grades, capabilities, etc. before ultimately contacting the potential supplier.

The new AD website has been therefore designed to open our doors more widely than ever, and assist the customer in its search. At the same time, through the 'contact' page, the customer can directly ask questions (and attach documents) for the persons in charge: sales network or market managers, depending on the country.

Please make yourself familiar with this external tool. If you cannot access it, you have to check with the hotline that your PC is properly configured, as regards the proxy exceptions.

Please also consider it as a 1<sup>st</sup> launch version. Improvements will be made, and any suggestions are welcome.
